Professional Summary

Junior SQA Engineer with hands-on experience in manual, API, and Playwright automation testing using JavaScript. Proven track record in executing functional, regression, and performance test suites within SDLC/STLC frameworks.

Education

American International University-Bangladesh **June 2021 – December 2025**
BSc in Computer Science and Engineering (Major in Software Engineering) *CGPA: 2.94*

Work Experience

Luminar Technology **August 2026 – Present**
Jr. SQA Engineer

- Collaborated with cross-functional teams to design, execute, and track functional, regression, and performance tests for automotive web applications using Jira to ensure high-quality software releases.

Skills

SQA & Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing
Test Design: Test Cases, Test Scenarios, Requirement Analysis, Bug Reporting
Testing Techniques: Black Box, White Box, Gray Box, BVA, Equivalence Partitioning
API Testing: Postman, REST APIs, Newman, JSON
Automation Testing: Playwright, JavaScript
Performance Testing: Grafana k6, JavaScript, Node.js
Testing Tools: Postman, Newman, Playwright, Selenium IDE
Programming & Web: C++, Java, C#, Python, HTML, JavaScript, PHP, TypeScript, SQL
Frameworks: Node.js, NestJS, Bootstrap, Tailwind CSS
Databases: MySQL, MongoDB
Methodologies: Agile/Scrum, SDLC, STLC

Projects

Manual Testing of dMoney Application **May 2026 – June 2026**
Manual Testing, Functional Testing, Exploratory Testing *Individual Project*

- Executed functional, boundary, and negative testing across core financial workflows (Cash In/Out, Send Money, Loan Management). [**View Project**]

API Testing of dMoney Application **July 2026 – August 2026**
Postman, Newman, REST API, JavaScript *Individual Project*

- Tested REST API endpoints using Postman/Newman with automated JavaScript assertions, dynamic environment variables, and auth checks. [**View Project**]

dMoney Web Portal E2E Automation Suite **September 2026 – October 2026**
Playwright, TypeScript, IMAP, Node.js, Git *Individual Project*

- Automated multi-role E2E workflows in Playwright featuring live Gmail IMAP integration for automated OTP retrieval, auth, and CSV exports. [**View Project**]

dMoney API Load & Performance Testing Suite **September 2026 – October 2026**
Grafana k6, JavaScript, REST API, JWT, k6-reporter, Git *Individual Project*

- Engineered k6 performance suites validating SLA metrics (p95 $<$ 1000ms, error rate $<$ 10%) under dynamic multi-phase Virtual User loads. [**View Project**]

Training & Certifications

Full Stack SQA/SDET **Issued Oct 2026**
Road To SDET — Credential ID: MTA58488

- Covered Manual Testing, API Testing, Web Automation, and Performance Testing. [**Show Credential**]
