Professional Summary

Junior SQA Engineer with hands-on experience in manual, API, and automation testing. Skilled in Postman, Playwright, JavaScript, and SDLC/STLC methodologies. Proven track record in executing functional, regression, and performance test suites to deliver robust software solutions.

Relevant Courseworks

- Software Quality and Testing
- Software Development Project Management
- Software Requirement Engineering
- Data Structures and Algorithms
- Operating Systems
- Database Management Systems
- Programming in Python
- Artificial Intelligence

Work Experience

Luminar Technology - Jr. SQA Engineer **August 2026 – Present**

- Collaborate with cross-functional development teams to design, execute, and maintain test cases for web-based automotive applications.
- Conduct functional, regression, and performance testing to ensure high quality and compliance with software requirements prior to product releases.
- Perform defect tracking and reporting using Jira, facilitating rapid bug resolution across development sprints.

Skills

SQA & Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Exploratory Testing
Test Design: Test Cases, Test Scenarios, Requirement Analysis, Bug Reporting
Testing Techniques: Black Box, White Box, Gray Box, BVA, Equivalence Partitioning
API Testing: Postman, REST APIs, Newman, JSON
Automation Testing: Playwright, JavaScript
Testing Tools: Postman, Playwright, Selenium IDE, Newman, Jira, VS Code
Programming & Web: C++, Java, C#, Python, HTML, JavaScript, PHP, TypeScript, SQL
Frameworks: Node.js, NestJS, Bootstrap, Tailwind CSS
Databases: MySQL, MongoDB
Methodologies: Agile/Scrum, SDLC, STLC

Projects

Selenium-Based Testing for Job Portal **March 2026 – April 2026**
Selenium IDE, HTML, JavaScript — Team Role: SQA

- Performed functional and non-functional testing of a multi-role job portal using Selenium IDE, covering authentication, job search, job posting, credit purchase, and candidate matching.

Manual Testing of dMoney Application **May 2026 – June 2026**
Manual Testing, Functional Testing, Exploratory Testing — Individual Project

- Tested dMoney financial features including Cash In, Cash Out, Send Money, payments, and loan management through functional, exploratory, negative, and boundary testing.
- **Project Link:** View Project

API Testing of dMoney Application **July 2026 – August 2026**
Postman, Newman, REST API, JavaScript — Individual Project

- Performed REST API testing of dMoney financial operations using Postman and Newman, covering authentication, user management, deposits, withdrawals, and money transfers.
- Created positive, negative, boundary, and authorization test cases with automated assertions, environment variables, and JavaScript scripts.
- **Project Link:** View Project

Education

American International University-Bangladesh **June 2021 – December 2025**
BSc in Computer Science and Engineering (Major in Software Engineering) *CGPA: 2.94*
